

About Harrisons Chartered Surveyors

Harrisons Chartered Surveyors are an independent firm of Property Consultants, Agents and Valuers. We provide a range of property services in respect of commercial property and land, and are able to offer specialist knowledge and experience in the Kent area.

Our two associated businesses, Harrison Mutch, Chartered Architects and Surveyors and Harrisons Residential, which concentrates on residential sales and relocations, place Harrisons Chartered Surveyors in the unrivalled position of being able to provide related professional services where required, creating a smoother and more streamlined process for the client. This gives Harrisons Chartered Surveyors a significant competitive advantage in the market.

In combining the three elements of Property Consulting, Architectural Design and Residential Agency in three associated businesses, Harrisons have endeavoured to provide their clients with the full spectrum of property and development expertise. Each separate firm within the Harrisons group is able to provide professional and effective advice in their own sphere of expertise, and combine where required to provide a comprehensive property and development service.

This is particularly advantageous for the development process, where the networking of the various elements can be fast tracked to provide a foreshortened acquisition, feasibility and construction period.

Whatever your requirements are, Harrisons Chartered Surveyors provides the ideal choice for all your needs.
